

RADILON A RV300K 990 GRI

Material code Colour code

DESCRIPTION

PA66 30% glass fiber reinforced injection moulding grade, low friction. Heat stabilized. Natural grey colour.

Suitable for parts requiring high stiffness, good mechanical resistance and low friction, along with good heat ageing properties retention. Particularly apt for components requiring improved wear resistance, such as gears, bearings, and cams.

ISO 1043 : PA66-T GF30

MATERIAL HANDLING AND PROCESSING

The material is delivered in moisture-proof packaging ready for processing. Maximum recommended water content for best processing is 0.15%. Typical conditions with a desiccant drier: temperature 80 ° C, dew point -20 ° C or below, time 2-4 h or more.

Special care must be taken to avoid moisture absorption and contamination with other polymers when adding regrind material. Colour variation and mechanical properties reduction may occur and should always be carefully monitored.

Processing Parameters

Melt Temperature:	Mold Temperature:	Injection Speed:
280 ÷ 300 °C	80 ÷ 100 °C	Medium-high

PRODUCT SAFETY AND APPROVALS

For safety instruction please refer to Material Safety Data Sheet

Underwriters Laboratories Inc. certified material. File number: E116324 www.ul.com

RoHS compliant 2002/95/CE and following amendments
