

RADIGREEN® MFL PE S-CORE

RADIGREEN® MFL PE S-CORE is conceived to match high sports and technical performances with the highest comfort while playing. Sports surfaces require high performance materials and sophisticated technical solutions.

RADIGREEN® MFL PE S-CORE has been designed to meet these very needs and to convince even the most demanding and doubting athletes.

The RADIGREEN® MFL PE S-CORE section is the result of careful studies on resilience. This section actually provides exceptional performance as for the blade's capacity to return to the upright position after matting.

As a consequence, ball roll and biomechanical tests show excellent results over time. The side appendixes running symmetrically along the blade spine give the yarn a soft, silky touch.

Its unique s-shape optimizes the covering effect and makes the synthetic turf conceived with RADIGREEN® MFL PE S-CORE yarn even more performing and aesthetically appealing.

TECNHICAL DATA

0A981

RAW MATERIAL	POLYETHYLENE
DTEX (SINGLE PLY)	2,000 dTex (4+4 plies)
THICKNESS	365 Micron
WIDTH	1.1 mm
AVAILABLE COLORS	Football Green (FG), Match Green (MA), White (BN), Yellow (GA)
UV CERTIFICATIONS ALREADY AVAILABLE	UV A and UV B (Yellow)

ADVANTAGES

1. PLEASANT TICKLING SENSATION WHEN IN CONTACT WITH SKIN
2. EXCELLENT RESILIENCE COMBINED WITH HIG RESISTANCE TO WEAR AND TEAR
3. GREAT COVERAGE EFFECT
4. EXCELLENT UV STABILITY

RADIGREEN® MFL PE S-CORE is tested according to FIFA 2 STARS standard.

CERTIFICATIONS

CERTIFICATION OF NON-TOXICITY

RADIGREEN® MFL PE S-CORE yarns are lead-free and phthalates-free

(CPSC-CH-1002-08 US Consumer Product Safety Commission, Total lead, and EN 14372 Plasticised materials, Determination of plasticizers)
