

Cologne (Germany), 24-27 February 2026

Performance and reliability for roofing: RadiciGroup takes part in DACH+HOLZ International

At Cologne, the Group presents its high-performance nonwoven solutions for construction membranes

RadiciGroup is exhibiting at **DACH+HOLZ International**, the leading international trade fair for the roofing, timber construction and building envelope sectors, taking place in **Cologne from 24 to 27 February (Halle 6 Booth 124)**. The event is an important European showcase for RadiciGroup, whose nonwovens division, Tessiture Pietro Radici, is taking the opportunity to present the Group's range of **high-performance technical nonwovens targeted at the building roofing industry**.

With over **30 years' experience** in nonwovens manufacturing, RadiciGroup develops semi-finished materials designed to improve the **resistance, durability and efficiency** of membranes for modern building construction. The Group is participating at DACH+HOLZ International through its **Nonwovens Business Line**, which offers technical solutions designed to meet the needs of a sector in continuous evolution, where reliability and performance over time are key factors.

At the trade show, RadiciGroup is presenting solutions from three of its product families:

- **Dylar** is the leading brand for the roofing sector, with a range of high-performance spunbond nonwovens featuring **high tenacity and resistance**, also achieved through **specific anti-UV, flame retardant and thermoresistant formulations** for applications requiring robustness and stability in the long run. Dylar is also characterized by its **surface uniformity**, making it particularly **suitable for moulding, lamination and gluing processes**.
- **Radimelt** includes meltblown nonwovens, distinguished by **high permeability and breathability**, especially suited to the production of breathable and vapor barrier membranes.
- **Responsible**, a spunbond made of up to 100% **pre-consumer recycled polypropylene** certified by SCS Global Services, combines **technical performance and attention to sustainability** with CO₂ abatement percentages of even over 50%.

*"For us, participating in DACH+HOLZ International is a strategic step to strengthen our presence in the roofing sector at the European level," Stefano Frione, CEO of Tessiture Pietro Radici, stated. "Thanks to our know-how built up during our over thirty years of experience and our highly specialized in-house Research & Development department, we are able to offer **reliable and***

customizable high-performance solutions to meet the most challenging requirements in the world of roofing.”

RadiciGroup nonwovens find applications in **breathable membranes, vapor barrier membranes, bituminous membranes, thermal insulation for roofs and facades, adhesive backings and flexible sealants**, making a significant contribution to construction quality and durability.

Along with technical performance, RadiciGroup continues to invest in **sustainability**: the **Responsible** range makes it possible to lower **CO₂ emissions by more than 50%**, calculated using **LCA (Life Cycle Assessment)** methodology.

With its presence at DACH+HOLZ International, RadiciGroup offers its products and services as a technological **partner of reference** for membrane and roofing system manufacturers, by combining **performance, innovation and environmental responsibility**.

RADICIGROUP – With approximately 2,800 employees, sales of €1,048 million in 2024, and a network of production units and sales offices spanning Europe, North and South America, and Asia, RadiciGroup today is a worldwide leader in the manufacture of a vast range of specialty chemicals, polyamides, high performance polymers, and advanced textile solutions, including nylon and polyester yarns, recycled yarn, bio yarns from renewable sources and nonwovens. Its products build on advanced chemical know-how and the vertical integration of the polyamide supply chain. They are developed for applications in a wide variety of industrial sectors, including the Automotive, Electrical/Electronics, Consumer Goods, Apparel, Furnishings, Building, Home Appliances and Sports sectors. Underpinning RadiciGroup’s strategy is an overriding commitment to innovation, quality, customer satisfaction, and social and environmental sustainability. With its macro business areas – Specialty Chemicals, High Performance Polymers and Advanced Textile Solutions – RadiciGroup is part of a broader industrial group encompassing textile machinery (ITEMA), energy (GEOGREEN) and the hotel business (SAN MARCO).
