

RADILON® MÉLANGE

100% Polyamide

Radici Yarn – a Company belonging to the RadiciGroup Fibres Business Area and a leading PA6 and PA6.6 synthetic fibre manufacturer – has officially launched its **Radilon® Mélange** product line.

The Radici Yarn Research and Development team has developed a smooth version of fully drawn polyamide yarn (FDY) that can be used to create a mélange effect. For the first time on the market, this new yarn allows for obtaining fabrics with a soft silk touch combined with a surprising two-tone effect, which varies depending on the dye composition. These outstanding results were achieved without affecting any of the characteristics of a 100% polyamide product.

APPLICATIONS ●

- The **Radilon® Mélange** project was designed to meet the requirements of the fashion world – a market always in search of new visual effects. From the start, the new development has garnered positive feedback from several different industrial sectors. This can be explained by the high versatility of the new product, which can be used in fields of application that have remained unexplored up to now.

- **KNITWEAR**
- **SEAMLESS / HOSIERY**
- **WARP-KNITTING**
- **WEAVING**

 PRODUCTS DYED USING ECOFRIENDLY SOLUTION DYEING TECHNOLOGIES.

 CLOTHING AND SPORT INDUSTRY

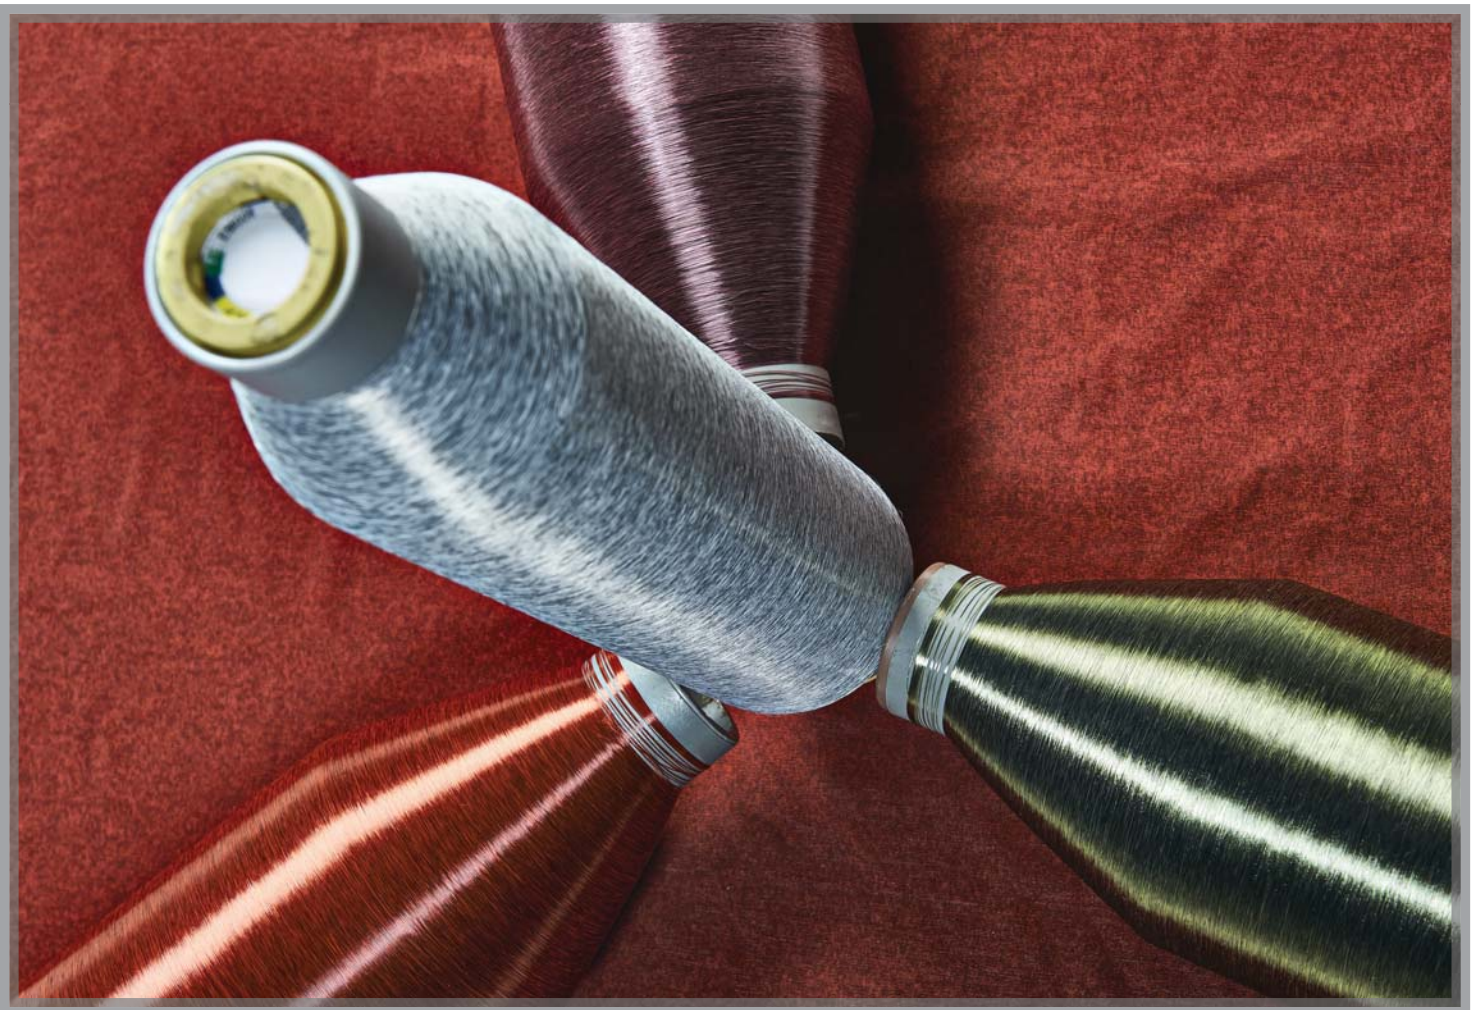

radilon®
Mélange

| COUNT/FILAMENTS | COMBINATION | | SECTION |
|-----------------|-------------|-----------|---------|
| 75/35 | 70% XFD* | 30% BLACK | ○ |
| 102/38 | 50% XFD* | 50% BLACK | ○ |
| 130/66 | 70% XFD* | 30% BLACK | ○ |

XFD* = Extra Full Dull Micro DPF

Besides the heather effects proposed below, **Radilon® Mélange** can be used to achieve new chromatic options according to customer specifications for the final product.
