Gist of the project:

The need for the project is based on the strategy and vision, reflecting the current and future planned activities of individual departments and individual needs.

Realization of activities is important:

- For employees as a mean to achieve the tasks for the implementation of current and future work in required quality and scope

- For the company as a mean to support efforts to continually improve the quality of our products, and their making in the shortest possible time

- For staff development and sustainability of previously implemented projects and educational activities

The target group of the project consists of selected employees of the applicant. In terms of structure educational program hits key management personnel, technicians, administrative employees and production workers.

In total, the project involves 44 people, including 19 women. Project activities are focused on particular widespread professional skills and gaining the qualifications of the mentioned target groups.

The project itself represents a significant quantitative and qualitative shift in the development of the professional skills of employees.

Implementation of the project will bring:

- More efficient and greater use of the potential and skills of its own employees

- Easier, faster and cheaper performance and control of selected manufacturing processes

- Increasing of product quality and customer satisfaction

And last but not least, it will contribute to the overall growth of quality and productivity as a key indicator for the future competitiveness of our companies in the textile industry.

Implementation of the project will be based on the specific mapped needs of the employees and specially designed educational programs. Organizationally, project team, composed of employees of the applicant, will be responsible for the project.

Implementation of key activities will be provided by external suppliers.
