

RADICIGROUP

PERFORMANCE PLASTICS

Founded in 1981 in Italy on the cornerstone of RadiciGroup's polyamide upstream integration, **RadiciGroup Performance Plastics** has grown into a global manufacturer of a complete range of engineering plastics to meet the needs of many industries including Automotive, Electrical & Electronics, Furnishing, Consumer Goods.

WE ARE GLOCAL: GLOBAL THINKING, LOCAL ACTION.

This has been our motto for the last 20 years' growth. Today, with eight plants strategically located in **4 continents** and **7 countries**, and a worldwide sales network, RadiciGroup Performance Plastics provides high-quality product standards on a global scale, besides offering state-of-the-art support in research & development and processing technologies.

RadiciGroup's **Upstream integration** in polyamide, coupled with the high flexibility of its polymerization plants has represented the basis for the continuous expansion of our polyamide-based product range, from long chain to high temperature polyamides. Expansion is a keyword for our future. We keep exploring new horizons, by expanding our product range and global presence, to promote the growth of RadiciGroup Performance Plastics.

PA-based engineering thermoplastics (PA6, PA6.6, co-polymers, PA6.10, PA6.12, PPA and other special PA for high temperature resistant applications) for injection moulding, extrusion and blow moulding. Main applications in the automotive, furniture, electrical-electronic, and technical-industrial sectors along with consumers goods.

POM acetal co-polymers destined to applications in the automotive and technical-industrial sectors.

A line of thermoplastic elastomers based on co-polyesters (TPE-E), SEBS and SBS for applications in the automotive and technical-industrial sectors along with consumer goods.

Low-environmental impact thermoplastic compounds, manufactured using mainly post-industrial, selected secondary raw materials (PA6, PA6.6). Main applications in the technical- industrial sector along with the automotive and electrical- electronic sectors.

A range of special PA-based thermoplastics, including long glass fiber reinforced grades (LFT) for injection moulding of high mechanical resistance items. Main application sectors: the automotive and technical-industrial sectors.

A line of PA and polyester – based flame-retardant engineering thermoplastics used for injection moulding and extrusion. Main application sectors: the electrical-electronic, automotive, technical-industrial sectors along with consumer goods.

A line of polyester based (PBT and PBT blends) engineering thermoplastics for injection moulding. Main applications in the technical and industrial sectors, along with the automotive and electrical-electronic sectors.

PA6.6 compounds including improved heat resistant specialities (Torzen® Marathon) for automotive, electrical & electronics, industrial and consumer applications.

High performance PPS based compounds, which are distinguished by the exceptional characteristics of chemical resistance, thermal resistance and dimensional stability.
