The information provided in this documentation correspond to our knowledge on the subject at the date of its publication. Information may be subject to revision as new knowledge and experience become available. The data provided fall within the normal range of product properties and relate only to the specific designated material; this data may not be valid for such material if used in combination with any other material or additive or in any process, unless expressly otherwise indicated. The data provided should not be used to establish specification limits. They are not intended to substitute any testing you may need to conduct to determine the suitability of a specific material for particular purposes. Since RadiciFil (RadiciGroup Performance Yarn) cannot anticipate all the variations occurring in current end-use conditions, RadiciFil makes no warranties and assumes no liability in connection with any use of the above information.

PERFORMANCE YARN

PRODUCT RANGE OPTIONS

www.radicigroup.com
Radiflor® Contract is a polyamide 6 and 6.6 BCF raw yarn suitable for hotels, institutional sectors, cruise ships and for all applications in which high performances are a must have without limiting the imagination of designers, that can come true thanks to high definition and vibrant appearance of colours on carpet.

Radiflor® Residential, polyamide 6 and 6.6 BCF raw yarns, in a wide range of combinations and processing techniques, are used in the manufacture of household carpets and rugs, in which every creative and artistic concept can be expressed in order to obtain tailored and unique results.

Radiflor® Solid is an intrinsically high performance Solution Dyed PA6 yarn that is mainly used on contract applications, but in the same way, in different counts and creative combinations selected from our broad colour palette, on cut or loop pile constructions, it is also suitable for household carpets and rugs.
