

RadiciGroup and DOMO Engineered Materials to join forces to form a global, independent tier-1 compounder

Lone Star Funds today announced the successful completion of the acquisition of DOMO Engineered Materials, a business division of DOMO Group.

At the same time, DOMO Engineered Materials is set to join forces with RadiciGroup's High Performance Polymers & Specialty Chemicals.

The new organization will combine established brands, industrial expertise & application know-how, and global reach to strengthen innovation, sustainability, and long-term customer partnerships.

Bergamo, May 12, 2026 – RadiciGroup welcomes the successful completion of the **transaction involving DOMO Engineered Materials**. This closing marks the final step of the transaction process and paves the way for the full integration of DOMO Engineered Materials into the new global platform created by Lone Star through the simultaneous acquisition of RadiciGroup's High Performance Polymers and Specialty Chemicals businesses and DOMO Engineered Materials.

The combined platform will serve a diversified range of end markets, including automotive, electrical and electronics, construction, consumer, and industrial applications. It will benefit from increased scale, enhanced resilience, and expanded resources to accelerate innovation and sustainability.

By joining forces, RadiciGroup and DOMO Engineered Materials will continue to build on their established technical expertise, industrial know-how, and customer relationships, while contributing to a stronger global platform designed for long-term competitiveness.

Following completion, the new organization will continue to offer the well-established TECHNYL® brand, ensuring continuity for customers and partners worldwide.

As part of the new organization, **Jochen Fabritius has been appointed Chief Executive Officer of the combined platform**. He brings more than 25 years of chemicals & industrial goods industry experience.

"I want to personally reassure our customers, partners, and employees across both RadiciGroup and DOMO Engineered Materials that continuity and stability are at the very heart of our priorities. Customers will continue to work with the same teams, the same experts, and the same trusted solutions they rely on today, within an organization clearly focused on long-term sustainability and strong, lasting partnerships" said **Jochen Fabritius**.

With the completion of this transaction, RadiciGroup's High Performance Polymers and Specialty Chemicals businesses, together with DOMO Engineered Materials, become part of a newly formed, more resilient platform, set to combine two highly complementary businesses with a strengthened product portfolio, broader geographic reach and enhanced technical capabilities.

About Lone Star

Lone Star is a leading investment firm with its principal office in London, UK advising funds that invest globally in private equity, credit and real estate. The firm has been successfully navigating complex situations for over 30 years. The funds are experienced value investors that seek opportunities in situations that are in flux or complicated by specific structural or financial factors, regardless of the prevailing market environment. Our deep bench of senior leaders and expert deal professionals ensures a strong foundation for successful investments and strategic decision-making. Since the establishment of its first fund in 1995, Lone Star has organized 26 private equity funds with aggregate capital commitments totaling approximately \$96 billion. About RadiciGroup

RadiciGroup is a leader in the manufacture of polyamide polymers and high-performance engineering polymers, including recycled and bio-based solutions, serving a wide range of industries, including automotive, electrical and electronics, and consumer and industrial goods. With a worldwide production and commercial network and a “glocal” approach, the Group places customers at the heart of its strategy, listening to their needs and working side by side with them to develop innovative, reliable and value-adding solutions, including tailor-made offerings. This translates into an approach focused on building long-lasting partnerships and developing sustainable applications through advanced materials, with the aim of creating value across the entire life cycle and reducing environmental impact for customers and end users.
